

## **fcB2B Standard**

### 997 Functional Acknowledgement Executive Summary

**The fcB2B 997 Functional Acknowledgement is sent as a response to other fcB2B transactions received. The 997 serves as a receipt, to acknowledge that an EDI transaction was received by the remote party. It is important to note that when you receive a fcB2B 997 in response to a transaction you sent previously, you only know that your document arrived and was successfully translated. It does not provide any indication that the transaction met the trading partners business requirements for processing.**
