

fcB2B Standard

Web Services Related Items Executive Summary

fcB2B has defined a series of web services for use by the industry to facilitate a common framework which suppliers and their customers can use to establish simple and low-cost electronic data for software applications. Web services are enterprise applications that exchange data over the internet.

The Related Items service is designed so the requestor can provide a SKU and be provided a list of items that compliment the SKU (e.g. trims, grout, glues, etc). This informa5on is also provided within the 832 Product Catalog. The web service provides real-5me updates to ensure the requestor has the most up to date informa5on.
