

# fcB2B Standard

## Web Services Reservation

### Executive Summary

**fcB2B has defined a series of web services for use by the industry to facilitate a common framework which suppliers and their customers can use to establish simple and low-cost electronic data for software applications. Web services are enterprise applications that exchange data over the internet.**

The Reservation service is the next step in the process of the order lifecycle. This enhances the stock check service and the 850 Purchase Order document. Control the process of finding stock, placing a reservation and sending a PO for the reserved process. This is done without leaving your system or talking with the supplier.
